- English: Proficient
- Hindi: Fluent

PROFILE SUMMARY

Aspiring MERN Stack Developer with experience in building dynamic and scalable web applications. Passionate about creating user-friendly interfaces and efficient backend solutions. Skilled in React.js, Node.js, Express.js, MongoDB, and WordPress. Seeking an opportunity to leverage my technical expertise in a challenging environment.

PROJECTS

1 Full-Stack Blogging Platform

- Developed a MERN stack application allowing users to create, edit, and manage blog posts.
- Implemented authentication using JWT for secure login.
- Utilized Redux for state management and React Router for navigation.
- Integrated MongoDB for database management.
- Used Cloudinary and Multer for image uploads.

2 Restaurant Ordering System (MERN Stack)

- Developed a full-stack food ordering system where users can browse menus, place orders, and track their status.
- Admin Features: Add, edit, and delete food items, update order statuses
- Technologies Used: React.js, Redux, Node.js, Express.js, MongoDB, JWT Authentication.

3 Cashflow - Personal Budget Tracker

- Built a responsive budgeting app using React, Vite, JavaScript, shadcn/ui, and MongoDB.
- Implemented transaction tracking, category breakdown, budget setting, and chart visualizations with Recharts.
- Designed interactive dashboard with summaries, CRUD functionality, and real-time spending insights.
